Keywords - Information System, Academic, Services

I. INTRODUCTION

Semarang State University began in 2007 using information technology and communication in the academic field to increase services to students. The service in the form of an online service called the Integrated Academic Information System (SIKADU). Before using an online service,

Semarang State University using computerized technology based academic services, which began in 1984 [1]. SIKADU initially used only in the judicium service but later evolved into other academic service includes registration, card contents study plan, scheduling lectures, lectures monitoring, student guardianship and registration of graduation [3]. SIKADU presence is intended to improve academic services to students.

II. THE IMPLEMENTATION OF SIKADU AT FACULTY OF ECONOMICS, SEMARANG STATE UNIVERSITY

The implementation of Integrated Academic Information System at the Faculty of Economics, Semarang State University include booking of subjects, academic registration, schedule of lectures, study group system, graduated, and validation of the academic achievement. The application of SIKADU according to students, lecturer, and department manager at the Faculty of Economics Unnes, implementations of SIKADU have advantages and disadvantages.

The advantages of the SIKADU application, including: 1) students facilitate in booking courses, 2) students at the time of academic registration should not come to

campus but accessible outside Unnes, 3) students can choose courses, space, day, study group, and hours are convenient because it is available in SIKADU, 4) students can organize their activities because there is a choice study group, 5) students can see the results of his study where he is by accessing SIKADU, 6) students can take care of transcripts quickly and accurately.

The disadvantages of the SIKADU application, including: 1) student difficulties to access SIKADU when SIKADU busy, 2) students can not charge the card of the study plan if a specified time limit runs out, and 3) students do not miss study group because the number of study group not in accordance with the number of students take. Although there are still shortcomings in its implementation but based on observations and interviews with students, lecturer and department managers, overall implementation of SIKADU can improve the effectiveness and efficiency of academic services at the Faculty of Economics Unnes. As for the view from SIKADU Semarang State University can be seen in Fig. 1.
